Subject index

Volume 102 (1999)

Acid and neutral sphingomyelinases; Sphingomyelin; Ceramide and tumor necrosis factor-α; Gene targeting **102**, 107

Acidic sphingomyelinase; Neutral sphingomyelinase; Sphingomyelin; Sphingomyelin in cycle; HL-60 cells; Lissamine–rhodamine dodecanoyl sphingosyl phosphorylcholine **102**, 65

Acid sphingomyelinase; Lysosomal storage diseases; Hematopoietic stem cells; Gene therapy; Niemann–Pick disease **102**, 179

Acid sphingomyelinase; Sphingolipid activator proteins; Intralysosomal vesicles **102**, 35

Apoptosis; Atherosclerosis; Cell proliferation; Sterol homeostasis; Signal transduction **102**, 79

Apoptosis; Ceramide; Sphingomyelinase; Germ cell; Oocyte; Sperm; Ovary; Testis **102**, 149

Apoptosis; Ceramide; Sphingomyelinase; Stress; Sphingomyelin **102**, 141

Atherogenesis; Sphingomyelinase; Ceramide; Lysosomes; Macrophages; Endothelial cell **102**, 123

Atherosclerosis; Apoptosis; Cell proliferation; Sterol homeostasis; Signal transduction **102**, 79

Biological membranes; Sphingolipids; Sterols; Lipid interaction; Cell metabolism; Lipoproteins; Vesicles; Monolayers **102**, 13

BODIPY™; Fluorescence microscopy; Fluorescent lipids; Membrane dynamics; Endosomes **102**, 55

Cell metabolism; Sphingolipids; Sterols; Lipid interaction; Biological membranes; Lipoproteins; Vesicles; Monolayers **102**, 13

Cell proliferation; Atherosclerosis; Apoptosis; Sterol homeostasis; Signal transduction **102**, 79

Ceramidases; Gastrointestinal tract; Sphingomyelinases **102**, 97

Ceramide and tumor necrosis factor-α; Acid and neutral sphingomyelinases; Sphingomyelin; Gene targeting **102**, 107

Ceramide generation; Sphingomyelin; TNF-induced activation **102**, 157

Ceramide; Sphingomyelinase; Apoptosis; Germ cell; Oocyte; Sperm; Ovary; Testis **102**, 149

Ceramide; Sphingomyelinase; Lysosomes; Atherogenesis; Macrophages; Endothelial cell **102**, 123

Ceramide; Sphingomyelinase; Stress; Apoptosis; Sphingomyelin **102**, 141

Ceramide; Sphingomyelin; Sphingomyelinase; Lysosome; Niemann–Pick disease; Signalling **102**, 167

Cytochrome P450; Sphingolipids; Xenobiotic metabolism; Signaling **102**, 131

Endosomes; Fluorescence microscopy; Fluorescent lipids; BODIPY™; Membrane dynamics **102**, 55

Endothelial cell; Sphingomyelinase; Ceramide; Lysosomes; Atherogenesis; Macrophages **102**, 123

Fluorescence microscopy; Fluorescent lipids; BODIPY™; Membrane dynamics; Endosomes **102**, 55

Fluorescent lipids; Fluorescence microscopy; BODIPY™; Membrane dynamics; Endosomes **102**, 55

Gastrointestinal tract; Ceramidases; Sphingomyelinases **102**, 97

PII: S0009-3084(99)00104-8

Gene targeting; Acid and neutral sphingomyelinases; Sphingomyelin; Ceramide and tumor necrosis factor-α **102**, 107

Gene therapy; Lysosomal storage diseases; Hematopoietic stem cells; Acid sphingomyelinase; Niemann–Pick disease **102**, 179

Germ cell; Ceramide; Sphingomyelinase; Apoptosis; Oocyte; Sperm; Ovary; Testis **102**, 149

Hematopoietic stem cells; Lysosomal storage diseases; Gene therapy; Acid sphingomyelinase; Niemann–Pick disease **102**, 179

HL-60 cells; Acidic sphingomyelinase; Neutral sphingomyelinase; Sphingomyelin; Sphingomyelin in cycle; Lissamine–rhodamine dodecanoyl sphingosyl phosphorylcholine **102**, 65

Intra-lysosomal vesicles; Acid sphingomyelinase; Sphingolipid activator proteins **102**, 35

Lipid interaction; Sphingolipids; Sterols; Biological membranes; Cell metabolism; Lipoproteins; Vesicles; Monolayers **102**, 13

Lipoproteins; Sphingolipids; Sterols; Lipid interaction; Biological membranes; Cell metabolism; Vesicles; Monolayers **102**, 13

Lipoproteins; Sphingomyelin; Phospholipids **102**, 3

Lissamine–rhodamine dodecanoyl sphingosyl phosphorylcholine; Acidic sphingomyelinase; Neutral sphingomyelinase; Sphingomyelin; Sphingomyelin in cycle; HL-60 cells **102**, 65

Lysosomal storage diseases; Hematopoietic stem cells; Gene therapy; Acid sphingomyelinase; Niemann–Pick disease **102**, 179

Lysosome; Sphingomyelin; Sphingomyelinase; Niemann–Pick disease; Ceramide; Signalling **102**, 167

Lysosomes; Sphingomyelinase; Ceramide; Atherogenesis; Macrophages; Endothelial cell **102**, 123

Macrophages; Sphingomyelinase; Ceramide; Lysosomes; Atherogenesis; Endothelial cell **102**, 123

Membrane dynamics; Fluorescence microscopy; Fluorescent lipids; BODIPY™; Endosomes **102**, 55

Monolayers; Sphingolipids; Sterols; Lipid interaction; Biological membranes; Cell metabolism; Lipoproteins; Vesicles **102**, 13

Neutral sphingomyelinase; Acidic sphingomyelinase; Sphingomyelin; Sphingomyelin in cycle; HL-60 cells; Lissamine–rhodamine dodecanoyl sphingosyl phosphorylcholine **102**, 65

Niemann–Pick disease; Lysosomal storage diseases; Hematopoietic stem cells; Gene therapy; Acid sphingomyelinase **102**, 179

Niemann–Pick disease; Sphingomyelin; Sphingomyelinase; Lysosome; Ceramide; Signalling **102**, 167

Oocyte; Ceramide; Sphingomyelinase; Apoptosis; Germ cell; Sperm; Ovary; Testis **102**, 149

Ovary; Ceramide; Sphingomyelinase; Apoptosis; Germ cell; Oocyte; Sperm; Testis **102**, 149

Phospholipase C; Sphinogmyelin; Sphingomyelinases **102**, 45

Phospholipids; Lipoproteins; Sphingomyelin **102**, 3

Signaling; Sphingolipids; Cytochrome P450; Xenobiotic metabolism **102**, 131

Signalling; Sphingomyelin; Sphingomyelinase; Lysosome; Niemann–Pick disease; Ceramide **102**, 167

Signal transduction; Atherosclerosis; Apoptosis; Cell proliferation; Sterol homeostasis **102**, 79

Sperm; Ceramide; Sphingomyelinase; Apoptosis; Germ cell; Oocyte; Ovary; Testis **102**, 149

Sphingolipid activator proteins; Acid sphingomyelinase; Intra-lysosomal vesicles **102**, 35

Sphingolipids; Cytochrome P450; Xenobiotic metabolism; Signaling **102**, 131

Sphingolipids; Sterols; Lipid interaction; Biological membranes; Cell metabolism; Lipoproteins; Vesicles; Monolayers **102**, 13

Sphingomyelin; Acid and neutral sphingomyelinases; Ceramide and tumor necrosis factor-α; Gene targeting **102**, 107

Sphingomyelin; Acidic sphingomyelinase; Neutral sphingomyelinase; Sphingomyelin in cycle; HL-60 cells; Lissamine–rhodamine dodecanoyl sphingosyl phosphorylcholine **102**, 65

Sphingomyelinase; Ceramide; Apoptosis; Germ cell; Oocyte; Sperm; Ovary; Testis **102**, 149

Sphingomyelinase; Ceramide; Lysosomes; Atherogenesis; Macrophages; Endothelial cell **102**, 123

Sphingomyelinase; Ceramide; Stress; Apoptosis; Sphingomyelin **102**, 141

Sphingomyelinases; Ceramidases; Gastrointestinal tract **102**, 97

Sphingomyelinase; Sphingomyelin; Lysosome; Niemann–Pick disease; Ceramide; Signalling **102**, 167

Sphingomyelinases; Sphinogmyelin; Phospholipase C **102**, 45

Sphingomyelin; Ceramide generation; TNF-induced activation **102**, 157

Sphingomyelin; Ceramide; Sphingomyelinase; Stress; Apoptosis **102**, 141

Sphingomyelin in cycle; Acidic sphingomyelinase; Neutral sphingomyelinase; Sphingomyelin; HL-60 cells; Lissamine–rhodamine dodecanoyl sphingosyl phosphorylcholine **102**, 65

Sphingomyelin; Lipoproteins; Phospholipids **102**, 3

Sphingomyelin; Sphingomyelinase; Lysosome; Niemann–Pick disease; Ceramide; Signalling **102**, 167

Sphinogmyelin; Sphingomyelinases; Phospholipase C **102**, 45

Sterol homeostasis; Atherosclerosis; Apoptosis; Cell proliferation; Signal transduction **102**, 79

Sterols; Sphingolipids; Lipid interaction; Biological membranes; Cell metabolism; Lipoproteins; Vesicles; Monolayers **102**, 13

Stress; Ceramide; Sphingomyelinase; Apoptosis; Sphingomyelin **102**, 141

Testis; Ceramide; Sphingomyelinase; Apoptosis; Germ cell; Oocyte; Sperm; Ovary **102**, 149

TNF-induced activation; Sphingomyelin; Ceramide generation **102**, 157

Vesicles; Sphingolipids; Sterols; Lipid interaction; Biological membranes; Cell metabolism; Lipoproteins; Monolayers **102**, 13

Xenobiotic metabolism; Sphingolipids; Cytochrome P450; Signaling **102**, 131
